

(7)

$$C_0 = 1,32 \text{ [pF]}$$

$$C_1 = K \epsilon_0 \frac{A}{2d}$$

$$C_0 = \epsilon_0 \frac{A}{d}$$

$$= 2,57 \text{ [pF]}$$

$$\frac{C_1}{C_0} = \frac{K \cancel{\epsilon_0} \frac{A}{2d}}{\cancel{\epsilon_0} \frac{A}{d}}$$

$$\frac{C_1}{C_0} = \frac{K}{2} \Rightarrow K = 3,89$$
