

$$\vec{B}_1 = \frac{\mu_0 I_1}{2\pi x} (-\hat{u})$$

$$\vec{B}_2 = \frac{\mu_0 I_2}{2\pi y} \hat{u}$$

$$\vec{B}_1 + \vec{B}_2 = \vec{0} \quad \Rightarrow \quad \frac{\mu_0 I_1}{2\pi x} - \frac{\mu_0 I_2}{2\pi y} = 0$$

$$\frac{\mu_0 I_1}{2\pi x} = \frac{\mu_0 I_2}{2\pi y}$$

$$\frac{y}{x} = \frac{I_2}{I_1}$$

$\Rightarrow$ En los puntos donde

$$\frac{y}{x} = \frac{3}{10}$$

el campo se anula

$$y = \frac{3}{10} x$$

En la recta el campo se anula
